

Aluminum Fences

Builders Fence Company is an exclusive dealer for ActiveYards® aluminum fences.

Aluminum fencing provides security, strength, and flexibility in gate construction, while requiring very little maintenance.

CORIGIN™

ActiveYards Corigin™ patent-pending technology features a solid metal construction that runs through the center of each rail and connects the pickets and rails with interior locking pivots from the inside, eliminating the use of screws. The result, a strong beautiful fence that withstands the seasons.

SOLARGUARD™

ActiveYards™ aluminum fences also feature SolarGuard, an exclusive color retention technology that protects your fence's color from the sun's harmful rays, which helps retain your fence's color for years to come.

Aluminum fences are ideal for protecting the perimeter of the property and securing pool areas.

Please inquire about our Harbor, Home, and Haven series to learn how the different key features apply to your fencing needs.

Vinyl Fences

Builders Fence Company is an exclusive dealer for ActiveYards™ vinyl fences. Vinyl fences can create a semi-private or private space for your outdoors. Styles range from traditional picket to ranch rail, all with numerous finishing options and virtually maintenance-free materials.

CAMBIUM™

ActiveYards Cambium™ technology gives you the look of natural wood without the maintenance.

GLIDELOCK™

ActiveYards GlideLock™ patent-pending design allows your fence to be assembled like a traditional picket fence, but locks together for a tighter fit without gaps. The result is perfect seclusion and a fence that holds up to wind better than traditional tongue and groove pickets.

SOLARGUARD™

ActiveYards™ vinyl fences are infused with SolarGuard™ technology as they are created. SolarGuard's color-retention technology protects your fence's color from the sun's harmful solar rays.

Please inquire about our Harbor, Home, and Haven series to learn how the different key features apply to your fencing needs.
