For several years Builders Fence Company has earned the service industry's coveted Angie's List Super Service Award.

I highly recommend Builders Fence Company and will always use them in the future. We just purchased this home one year ago. Since, we have dealt with approximately 4 contractors on different projects. Builders is the only contractor we had ZERO problems with. Not only that, but they were super responsive. Other contractors never return calls and do not make themselves available. Builders Fence Co, the entire team from the sales, management and installation team, were all responsive.

—Edward M. | Falls Church, VA

Working with David and Ted @ Builders Fence went about as smooth as you could ask for. From quote to Install the communication was great. They had a customer reschedule and were able to install our fence a day sooner than planned. The crew showed up when they were supposed to and a few hours later the job was complete and we had our fence. I highly recommend using Builders Fence.

—Peter W. | Leesburg, VA

FINANCING OPTIONS: 0% interest and traditional low-interest loan available to qualified customers. Ask one of our representatives for more details.

ABOUT WOOD FENCES

Western Red Cedar (WRC)

With its unsurpassed natural beauty and stability, Western Red Cedar makes the perfect fence. Cedar trees take a long time to grow which results in true straight-grain boards that have a tendency to not shrink or warp. Western Red Cedar is naturally impervious to insect infestation & rotting.

Pressure-Treated Pine (PTP)

PTP utilizes a special treatment that is infused into the wood under great pressure. This helps the wood combat against insect infestation and premature rotting. Pine is a “fast-growth” tree and is readily available, making it an affordable material choice for fences.

BUILDERS FENCE
Exclusive
LABOR WARRANTY

In addition to any available manufacturer's warranty all of our installed products come with our exclusive Builders Fence Company 12-Month Labor Warranty* that covers:

- Loose pickets
- Loose sections
- Warping of western red cedar components
- Premature decaying**
- Complete wood splits
- Gate adjustments

** See the complete Builders Fence Company written warranty*
*** See the Micropro®/Lifewood® Residential & Agricultural Limited Warranty*

Suggested Maintenance

To keep your wood fence looking and functioning its best, we recommend you follow a basic annual maintenance plan. First, start by adjusting and oiling your gate hinges and latches to ensure they open and close properly. Next, make sure all pickets, runners and cap boards are securely fastened. Should you come across a board that is so warped that it has pulled away from the fence, replace it. Eliminate dirt build-up, grim and surface mold by cleaning your fence with a mild detergent. Finally, we recommend you apply a sealant or stain that includes a UV inhibitor. Remember to follow the manufacturer's suggested application instructions.
