For several years Builders Fence Company has earned the service industry's coveted Angie's List Super Service Award.

I highly recommend Builders Fence Company and will always use them in the future. We just purchased this home one year ago. Since, we have dealt with approximately 4 contractors on different projects. Builders is the only contractor we had ZERO problems with. Not only that, but they were super responsive. Other contractors never return calls and do not make themselves available. Builders Fence Co, the entire team from the sales, management and installation team, were all responsive.

-Edward M. | Falls Church, VA

Working with David and Ted @ Builders Fence went about as smooth as you could ask for. From quote to install the communication was great. They had a customer reschedule and were able to install our fence a day sooner than planned. The crew showed up when they were supposed to and a few hours later the job was complete and we had our fence. I highly recommend using Builders Fence.

ABOUT WOOD FENCES

Western Red Cedar (WRC)
 With its unsurpassed natural beauty and stability, Western Red Cedar makes the perfect fence. Cedar trees take a long time to grow which results

in true straight-grain boards that have a tendency to not shrink or warp. Western Red Cedar is naturally impervious to insect infestation & rotting.

Pressure-Treated Pine (PTP)
 PTP utilizes a special treatment that is infused into the wood under great pressure. This helps the wood combat against insect infestation and

premature rotting. Pine is a "fast-growth" tree and is readily available, making it an affordable material choice for fences.
